

“We are delighted to launch Design Confab in Pune, an initiative that is very close to our hearts. The idea was to create a first-of-its-kind knowledge forum for decision makers from the architectural and interior design fraternity to deliberate on best practices, emerging business opportunities and the changing dynamics of design in India. We will be taking it to multiple locations across India within the next one year and globally as well. With increasing pressure to lower operating costs, making existing structures more efficient is a default mandate and therefore we have chosen ‘Best Practices for Smart, High-performance Indian Buildings’ as our inaugural theme for Design Confab.”

— Rajesh Mehra, promoter and director, Jaquar Group
